Executive Summary

Pricing, Master Data & FP&A delivery lead. Five years specifying what systems must calculate, validating that they do, and driving them to production across an **80-branch network**. Requirements from accounting, sales, IT, logistics and product; a spec naming the decision and what it costs to get wrong; validation with the teams that consume the output; rollouts sequenced around branch operating hours. Root-level pricing authority over a **multi-million SKU catalog** and **565+ manufacturer lines**. Fifteen models shipped, from **ERP cost architecture** through **geospatial market analysis**.

CORE COMPETENCIES

Financial Strategy: Tiered Margins, KVI Cross-Subsidization, Activity-Based Costing (ABC), TCO, Price Waterfalls

Master Data Governance: AutoCare (ACES/PIES), SKU Lifecycles, Supersession Chaining, Hazmat Compliance

Full-Stack Analytics: SQL, Python (GeoPandas, NumPy, pandas, scikit-learn, Flask, Jupyter), JS (Leaflet, Chart.js), Phocas BI

Delivery & Ops: Requirements Gathering, Stakeholder Alignment, End-to-End Execution, Crisis Management

WORK EXPERIENCE

Arnold Motor Supply (Merrill Company)

Spencer, Iowa

Pricing & Master Data Analyst

October 2021 – Present

DELIVERY & PROJECT EXECUTION

- **Requirements & Specification:** Translate what accounting, sales, and field managers ask for into a spec that names the decision, the consumer of the output, and the failure cost; secure executive sign-off before a line of logic is written.
- **Cross-Functional Delivery:** Drive builds from spec through validation to production across six departments; sequence rollouts around branch operating hours so no deployment interrupts quoting or shipping.
- **Full-Stack BI Development:** Specified, directed and validated front-to-back analytics applications, from Python/Flask data engines to interactive JavaScript dashboards, moving the department from manual audits to live margin-defense tracking.
- **Crisis Continuity:** Held data continuity through temporary satellite locations during a catastrophic regional flood; the network kept quoting and shipping while its physical center was underwater. Execute emergency pricing deployments, such as global tariff hikes, on weekend rollouts.

PRICING STRATEGY & MARGIN DEFENSE

- **Margin Modeling:** Developed a Python Monte Carlo simulation to forecast supply chain margin risk; modeled landed-cost volatility by integrating utility overhead, freight, and ABC velocity (approved by Lead Managing Partner).
- **Variance Analysis:** Model P&L impact of supplier cost fluctuations to define cost-pass-through percentages prior to ERP deployment.
- **Gap Diagnostics:** Use Phocas BI to isolate localized market friction; conduct stratified sampling across KVIs and low-velocity SKUs to deploy targeted price optimizations.
- **B2B Quoting:** Model competitive pricing for state, municipal, and commercial fleet bids, using historical cost data to secure high-volume RFPs.

SYSTEMS & MASTER DATA

- **ERP Governance:** One of three personnel with root-level access to audit, modify, and deploy enterprise pricing across 80 branches; cleanse and map vendor files to internal SQL schemas for zero-defect updates.
- **AutoCare Standards:** Manage PCdb/VCdb integrations for 565+ manufacturer lines; align ERP nomenclature with national standards to ensure fitment accuracy and eliminate catalog fragmentation.
- **SKU Onboarding:** Execute Just-In-Time master data creation for active POS demand; use Excel logic to cascade pricing matrices and validate Hazmat and regulatory compliance.

EDUCATION & CERTIFICATIONS

- **Iowa Lakes CC** — Associate of Arts & Associate of Science
- **W3Schools** — Certified in Data Science & Certified SQL Developer
