Executive Summary

Strategic Pricing & Data Analyst specializing in margin protection, enterprise data governance, and competitive intelligence for high-volume supply chains. Entrusted by executive leadership to manage the financial and structural integrity of a **multi-million SKU database** for an **80-branch distribution network**. Expert in integrating SQL-driven market intelligence and AutoCare industry standards to transform raw ERP data into aggressive pricing strategies that protect corporate profitability and maximize GMROI.

CORE COMPETENCIES

Pricing: Tiered Margins | KVI Strategy | Activity-Based Costing (ABC) | Total Cost of Ownership (TCO) | Price Waterfalls

Master Data: AutoCare ACES/PIES | Fitment | Supersession Chaining | Hazmat Data Governance

Analytics: SQL (Data Extraction) | Python (Data Analysis) | Phocas BI | Excel Power Query (Advanced XLOOKUP)

Ops: B2B Account Provisioning | POS Troubleshooting | Crisis Mgmt

WORK EXPERIENCE

Merrill Company, Arnold Motor Supply

Spencer, Iowa

Inventory, Product, and Pricing Analyst

September 2021 – Present

Data Governance & Technical Execution

- **Enterprise Data Governance & QA:** Serve as the ultimate data custodian with exclusive authority to audit, modify, and deploy ERP pricing data across an 80-branch network. Independently cleanse and reformat non-compliant vendor files to achieve precise alignment with internal SQL schemas, ensuring block updates execute without system failure.
- **Industry Data Standards (ACES/PIES):** Lead enterprise-level PCdb/VCdb integrations for 565+ manufacturer lines. Align internal ERP naming conventions with national AutoCare standards to ensure vehicle fitment accuracy and prevent catalog fragmentation.
- **SQL & Phocas Business Intelligence:** Architect SQL logic to transition the department from manual audits to automated, 12-month rolling usage variance reports that instantly flag margin degradation.
- **Real-Time SKU Onboarding & Data Enrichment:** Execute Just-In-Time master data creation to support live-fire sales opportunities. Leverage advanced Excel functions against vendor master files to extract costs, flow pricing matrices, and ensure Hazmat/regulatory compliance before deployment.
- **Enterprise Support & Account Provisioning:** Managed real-time B2B customer onboarding, consistently achieving sub-3-minute SLAs by mirroring complex pricing matrices; diagnosed and patched root-cause database/POS errors mid-transaction to rescue live-fire field sales.

Margin Defense & Strategic Intelligence

- **Advanced Analytics & Margin Modeling:** Designed a prototype Python Monte Carlo simulation to forecast supply chain margin risks; integrated warehouse floor space, freight allocation, utility overhead, and ABC inventory velocity tiers to model true landed-cost volatility, securing direct 1:1 buy-in from the corporate President.
- **Pricing Governance & Margin Defense:** Act as the final gatekeeper for enterprise pricing by enforcing corporate margin baselines against unauthorized field-level discount requests. Mitigate rogue discounting by auditing overrides and negotiating profitable middle-ground pricing structures.
- **Pre-Deployment Margin Analysis:** Conduct variance modeling to quantify the P&L impact of supplier cost fluctuations. Provide leadership with actionable, data-driven insights to determine optimal cost-pass-through strategies before executing master data updates.
- **Proactive Margin Gap Analysis:** Utilize interactive BI dashboards as a strategic analysis tool to isolate market misalignments. Conduct stratified sampling across KVIs and low-velocity SKUs to diagnose competitor margin gaps and escalate viable price optimizations.
- **Lost Sales Analytics & Visualization:** Architected interactive Excel dashboards to monitor weekly attrition; synthesized market data and contract variables to isolate operational breakdowns from pricing discrepancies.
- **B2B Contract Quoting & Fleet Bid Support:** Support high-value state, municipal, and commercial fleet bids by aggregating cross-market competitor margins and historical cost data to secure lucrative, high-volume contracts.

EDUCATION & CERTIFICATIONS

- **Iowa Lakes CC** — Associate of Arts & Associate of Science
- **W3Schools** — Certificate in Data Science
