Executive Summary

Pricing, Master Data & FP&A lead with a delivery record. Five years specifying what systems must calculate, validating that they do, and driving them to production across an **80-branch network**. I run the loop end to end: requirements from accounting, sales, IT, logistics and product; a spec that names the decision and the cost of getting it wrong; validation with the teams that consume the output; and a rollout sequenced around branch operating hours. Fifteen models shipped, from **ERP cost architecture** through **geospatial market analysis**. Portfolio: austin-stethem.github.io

CORE COMPETENCIES

Financial Strategy: Tiered Margins, KVI Cross-Subsidization, Activity-Based Costing (ABC), TCO, Price Waterfalls

Master Data Governance: AutoCare (ACES/PIES), SKU Lifecycles, Supersession Chaining, Hazmat Compliance

Full-Stack Analytics: SQL, Python (Geopandas, Numpy, Pandas, Scikit-Learn, Flask, Jupyter), JS (Leaflet, Chart.js), Phocas BI

Delivery & Ops: Requirements Gathering, Specification, Stakeholder Alignment, Phased Rollout, Crisis Management

WORK EXPERIENCE

Arnold Motor Supply (Merrill Company)

Spencer, Iowa

Pricing & Master Data Analyst

October 2021 – Present

Delivery & Project Execution

- **Cross-Functional Delivery:** Gather requirements from accounting, sales, IT, logistics, and product; specify what each build must calculate, validate output with the teams that consume it, and sequence rollouts around branch operating hours.
- **Full-Stack BI Development:** Specified, directed and validated front-to-back analytics applications, from Python/Flask data engines to interactive JavaScript dashboards, moving the department from manual audits to live margin-defense tracking.
- **Crisis Continuity:** Held data continuity through temporary satellite locations during a catastrophic regional flood; the network kept quoting and shipping while its physical center was underwater. Deploy emergency pricing changes, such as global tariff hikes, on weekend rollouts.
- **ERP Governance:** One of three personnel with root-level access to audit, modify, and deploy enterprise pricing across 80 branches; cleanse and map vendor files to internal SQL schemas for zero-defect updates.
- **AutoCare Standards:** Manage PCdb/VCdb integrations for 565+ manufacturer lines; align ERP nomenclature with national standards to ensure fitment accuracy and eliminate catalog fragmentation.

Pricing Strategy & Margin Defense

- **Margin Modeling:** Developed a Python Monte Carlo simulation to forecast supply chain margin risk; modeled landed-cost volatility by integrating utility overhead, freight, and ABC velocity (approved by Lead Managing Partner).
- **Variance Analysis:** Model P&L impact of supplier cost fluctuations to define cost-pass-through percentages prior to ERP deployment.
- **Gap Diagnostics:** Use Phocas BI to isolate localized market friction; conduct stratified sampling across KVIs and low-velocity SKUs to deploy targeted price optimizations.
- **B2B Quoting:** Model competitive pricing for state, municipal, and commercial fleet bids, utilizing historical cost data to secure high-volume RFPs.
- **SKU Onboarding:** Execute Just-In-Time master data creation for active POS demand; cascade pricing matrices and validate Hazmat and regulatory compliance.
- **Systems & Master Data:** Multi-million SKU catalog across 80 branches; supersession chaining, lifecycle state management, and POS resolution.

EDUCATION & CERTIFICATIONS

- **Iowa Lakes CC** — Associate of Arts & Associate of Science
- **W3Schools** — Certified in Data Science & Certified SQL Developer

Emmetsburg, IA
